FOREWORD

Thank to Allah SWT because today we have the opportunity to hold an international conference. This conference was organized by UNUGHA Cilacap in collaboration with various universities both from domestic universities such as UNSOED, UNU Purwokerto and from abroad, such as with universities from Pakistan and Malaysia. It is hoped that this activity can be a motivation for us as Muslims to always ta'aruf or get to know others as commanded by Allah SWT, whether ta'aruf with other nations, languages and universities. In sha Allah, we will collaborate and synergize so that we can gain extraordinary strength.

UNUGHA Cilacap is a university that was born from the thoughts of ulama, from people based on religious knowledge. Starting from an institute, thank God, it has now become a university. Various kinds of study programs were opened as an effort to deliver a generation of Muslims who are better prepared to face the future, who have character and have abilities in various disciplines. So this afternoon, we and various universities are holding scientific activities, called Al Ghazali International Conference. Hopefully, this is not just held once but it expected to be held continuously. Therefore, through this activity, it is hoped that UNUGHA Cilacap will have high inclusiveness in behaving, interacting and working together with anyone from various different backgrounds because Islam is open. Thus, there is openness between all of us and it is hoped that various universities from various countries will understand or recognize Islam, UNUGHA Cilacap, and Indonesia. Hopefully this inclusiveness will become a character that will continue to stick with all of us. In addition, we also have open higher education institutions because there is an energy of openness so there will be many things that can be updated because there is something that can be explored. Therefore, to all those present on this occasion, we hope that we can synergize with UNUGHA. Hopefully Cilacap will continue to progress and develop.

The existence of digital transparency today makes everything more open and advanced. UNUGHA can be seen in various cities and even countries. UNUGHA Cilacap will also collaborate with Thailand and Malaysia. The existing management is management that is open and can be seen by anyone. Hopefully various parties from various countries can see the various potentials that UNUGHA has. Thank God, we are increasingly being challenged with various new competencies. Once again, this activity is very good and encourages us to be inclusive, renewable, have new energy. Therefore, at this time we increasingly need new energy, new thinkers. Hopefully this activity will continue with various themes. In sha Allah, our young generation will be prepared with various kinds of skills. Hopefully this will be a trigger for other positive activities.

Cilacap, 2023-12-20
Rector

Drs. K.H Nasrulloh, M.H.
